

### **What is the Brentwood Bound Plan?**

The Brentwood Bound plan is a comprehensive solution to overcome flooding and public safety challenges presented by the Deer Creek Channel and to improve the Manchester Road corridor within the City of Brentwood.

### **Why should the community get involved?**

The City of Brentwood has a long history and tradition of excellence. There are many details to consider in the Brentwood Bound plan, and residents' experiences, thoughts, concerns and ideas are important in ensuring the plan's solutions best meet the community's needs and continue to build a bright future for the City of Brentwood.

# Brentwood Bound Plan

The City of Brentwood looks forward to its second century as a thriving community. With an eye on continued progress and building a bright future for its citizens, the Board of Aldermen approved the **Brentwood Bound** plan to overcome some of the community's long-term challenges and revitalize the Manchester Road corridor.

## Identifying Challenges

- Brentwood has long dealt with flooding issues along Deer Creek that have at times crippled the community and caused great challenges for friends and families.
- With nearly 30 flooding events in the past 60 years, it is clear that the current flood mitigation system is unable to manage the influx of water during heavy rain events.
- The area of Manchester Road between Hanley Road and Bremerton Road is in need of repair, improved pedestrian access and overall safety.

## Help to Build a Bright Future for Brentwood

Join the Brentwood Bound conversation! Two Open Houses will be held for residents to learn, discuss, and share feedback about the plan. The community's input will be used to assist in fine-tuning and finalizing the Brentwood Bound plan to benefit the future of Brentwood.

## Exploring Solutions

Our community leaders have developed a plan to address the identified challenges through three projects:

### Deer Creek Flood Mitigation

A major component of the Brentwood Bound plan is the Deer Creek Flood Mitigation project. This project includes the planning, design and construction of improvements to the Deer Creek channel and floodplain including streambank stabilization, natural floodplain restoration and native vegetation planting to alleviate ongoing flooding problems and protect properties from frequent flooding.

### Manchester Road Improvements

The City of Brentwood is working with the Missouri Department of Transportation (MoDOT) to update the roadway, improve pedestrian access and enhance the overall appearance of Manchester Road from Hanley Road to Bremerton Road while making the area safer for pedestrians.

### Deer Creek Greenway Connector

The Deer Creek Greenway Connector involves the planning, design and construction of a connection between the City of Brentwood's Rogers Parkway and the Deer Creek Greenway. The City is partnering with Great Rivers Greenway to connect residents to the surrounding communities with the enhanced greenway.

## Attend an Open House!
