Subject: McGrath School

Lisa- Some of the concerns of the PWC on traffic at McGrath are:

1. The committee desires a written plan and agreement on how the School Board will handle parking needs during construction of the new McGrath (2021-2022) and during the combined elementary school staff + students when Mark Twain is remodeled in 2023.
2. Notification and updates to the neighboring side street residents regarding the scheduled work are needed to help understand the impacts of this project.
3. What will be the impact of arrivals/dismissals on existing McGrath during construction of the new school since contractors and material suppliers will be on site occupying some of the existing parking.

Kelle and Bola may have something else to add since I tried to jot down some comments while presenting and could have missed something.
