Event Pavilion Site Concept Update

Event pavilion moved south to avoid MSD easement and align with parking lot edge.

Catenary lighting aligned with interior event space to strengthen connections between the pavilion and lawn.

Food truck location and orientation optimized for visibility and patron queuing.

Rain garden located south of the pavilion captures run-off from building and hardscape zones.

Food Truck Parking Area

Food truck parking with electrical hook-ups

Catenary Lighting

Event Pavilion Plan Update

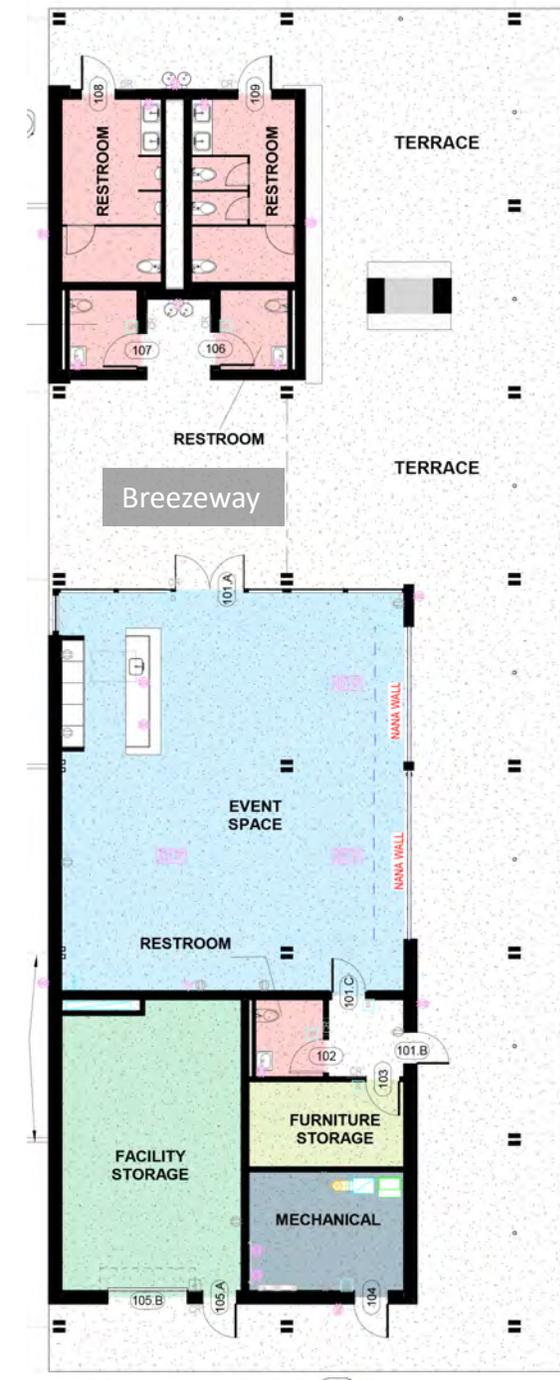

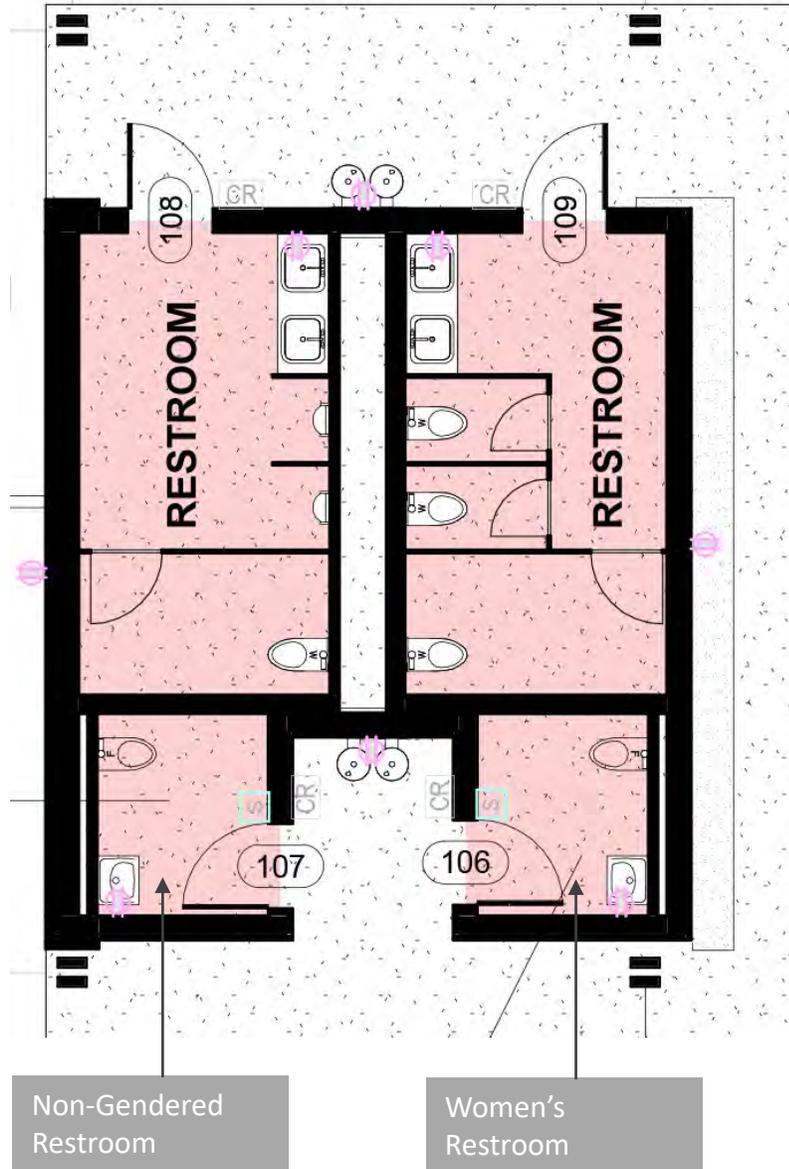

Restroom block re-configured to provide north facing conventionally gendered rooms for day to day park use.

Unisex toilet rooms off the breezeway space provide for a non-gendered toilet room as well as an additional women's room and function well to provide extra capacity for event lawn and event room functions

Per UPC 2009 the capacity shown here is 900 persons for an event lawn outdoor assembly. The event lawn in a tightly packed concert config could be as high as 1,200. In that instance portable toilets would be placed at the north end of the parking lot

Achieves fixture parity.

Unisex restroom in the main building is dedicated to the event space and typically would not be accessible from the exterior (door is exit only).

- Natural / Regional Materials preferred that relate well to the park setting
- Durable and Low-maintenance surfaces and finishes
- Abuse and Graffiti resistant
- Accessible and Inclusive

Material Palette

Sealed Ground Face CMU with filled voids – typical

Acoustical Fabric

Black Painted Gussets & Bolts

Quartz Countertop

Brushed Stn Steel

Douglas Fir Structure

Cabinet Fronts

Contrasting Ground Face CMU fixture wall

Toilet Partitions

Decorative Acid Etched Concrete

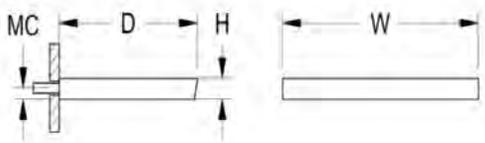

Solid Surface Counters

EIFS

Honed Limestone (EW Gold)

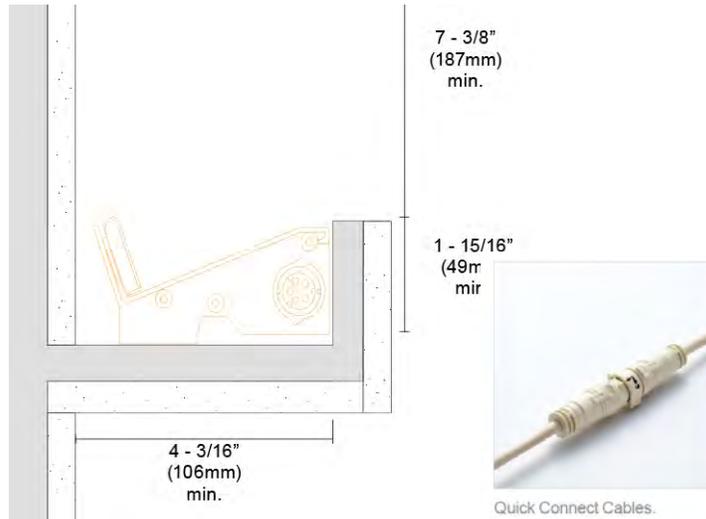

Decorative Ground Concrete at Event Space

Light Fixtures

W	H	D	MC
15.5 in 39.4 cm	1.5 in 3.8 cm	1.1 in 27.9 cm	0.8 in 2 cm
Mounting Weight Approximate: 10 lb (5 kg)			

SPI Lighting Echo Blade EIW12179 (16")
black finish (PT11)

Vode Lighting ZipWave 707

Goccia 2.6 LED In-Grade Light, IP 67, 1.8" dia., 74 Lumen output

Restroom Fixtures

Bradley Integral Solid Surface Sink and Conter

Integral Soap and Blower

Solid Surface Countertops and Lavatories

Phenolic Resin Toilet Partitions
