WORKING

SMOKE DETECTORS SAVE LIVES

<p>1 Remove the smoke alarm from the wall or ceiling.</p>	 A white smoke alarm is shown with a red arrow pointing downwards, indicating it is being removed from the ceiling.	 A white smoke alarm is shown with a date stamp 'October 6, 2016' and a green battery icon, indicating the date of manufacture and battery status.	<p>2 Look at the back of the alarm for the date of manufacture.</p>
<p>3 Smoke alarms should be replaced 10 years from the date of manufacture.</p>	 A circular diagram with two smoke alarms and a central '10 years' text, with arrows indicating a 10-year replacement cycle.	 A white smoke alarm is shown with a red arrow pointing upwards, indicating it is being installed on the ceiling.	<p>4 Put the alarm back on the ceiling or wall if it is less than 10 years old.</p>

A closed door may slow the spread of smoke, heat and fire.

Test smoke alarms at least once a month by pushing the test button.

If the smoke alarm sounds, get outside and stay outside. Go to your outside meeting place.

Install smoke alarms in every bedroom, outside each separate sleeping area, and on every level of the home, including the basement. Larger homes may need more alarms. For the best protection, make sure all smoke alarms are interconnected. When one sounds, they all sound.

Call the fire department from a cellphone or a neighbor's phone. Stay outside until the fire department says it's safe to go back inside.

The Brentwood Fire Department wants to keep everyone safe. Please call if you need assistance checking your smoke detector or replacing your battery. **314-963-8612.**
